

BaseCAPS

Define | Design | Develop | Deliver

BaseCAPS from SWT Group is an easy to apply, cost effective stain-blocking primer for white silicone topcoats, typically applied to asphaltic roofing materials.

Specifically designed for the roofing industry, this water based acrylic primer is a ready-to-apply 1K product which prevents asphalt staining and yellowing. When used as a primer for silicone top coat applications, **BaseCAPS** matches the performance of industry leading 2K epoxy primers but at a lower cost and significantly easier application process as confirmed through Xenon-Arc testing.

With **BaseCAPS**, your roof can be ready for a silicone topcoat in as little as 2 hours after application, compared to a typical 24 hour downtime when using epoxy primers. Its superior flexibility provides protection against damage by snow, rain, hail and maintenance foot traffic.

Advantages over typical epoxy primers

- One Component - no need for mixing two materials and no pot life issues.
- Ease of Use - Stable, low viscosity product that applies quickly and easily
- Adhesion – Superior adhesion to bituminous substrates,
- Stain Resistance- Excellent stain blocking characteristics at lower film builds .
- Faster Dry Time- BaseCAPS can be top coated 2 hours after application
